Inside the row, options are removed while Row is locked;

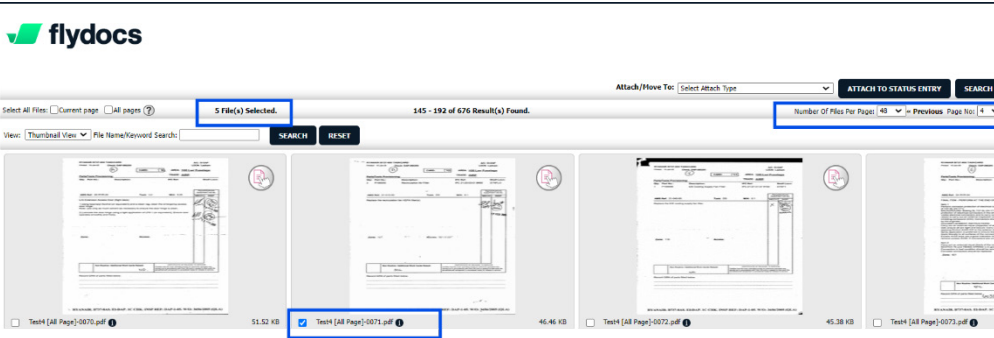

- **Multiple documents selection on different pages of folder in Maintenance History section**

Description: As a user, I want to select multiple documents on multiple pages and ensure the solution remembers my choices. This is now available to ensure selections become 'sticky'.

This can be done by selecting: Maintenance History >> folder >> opened folder and selected 2 options on page 1

Maintenance History >> folder >> opened folder and selected few pages on page 2,3 and 4 – UI

- **Allowing WOA & WS XML type in Document Notification Service (DNS)**

Description: flydocs now supports WOA and WS XML file too which is currently coming from AMOS.

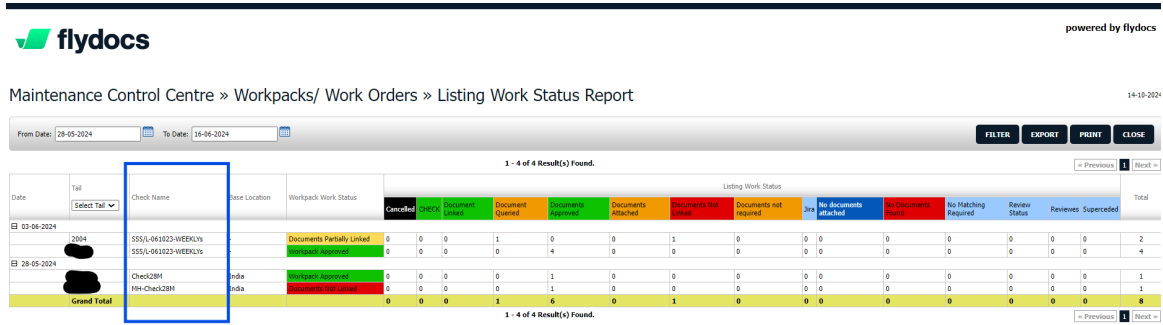

<barcode>WOA.3601</barcode> and <barcode>WS.3602</barcode>

```
<type>WS</type>
<number>-1550</number>
<barcode>WS. -1550</barcode>
```

- **Check name column as default for listing work status report**

Description: As a user, I want to see “Check name” column in my listing work status report for quick check on pending work in total instead of other columns like barcode or etc.

MCC>> Manage by date>>Workpack/Workorders>>reports >> Listing work status report

- **Populate archiving data from CSV into metadata**

Description: As a user, I can request to add my CSV or excel file data (for example: specific check name, WP detail, parent component details, etc) in file's Metadata. This allows for additional data to be added or tagged.

- **Flight event and its records tracker**

Description: In the MID section, there is a new feature for flight events and their records. This showcases flight numbers, dates, departure and destination airports alongside the ability to manage issues and view the work status.
